

Year-End Report Q4

January - December 2023

Building technology that understands, supports and predicts human behavior.

Strong organic growth in both Business Areas

October- December 2023

- Net sales amounted to SEK 91.3 (55.3) million, an increase of 65% compared to the corresponding period previous year. Organic growth (adjusted for the new accounting principle implemented in iMotions 2022) sums up to 50%. Both the business area Automotive and Behavioral Research show very high growth in the guarter.
- EBITDA amounted to SEK -27.1 (-60.6) million. The improved result is driven by higher sales and lower OPEX. One-time expenses impact the result negative with 4.8 million, mainly due to social security charges from share incentive programs referring to higher stock market price. This expense does not affect the cash flow.
- Operating loss amounted to SEK -67.1 (-100.1) million. Depreciation of the surplus value created in conjunction with the Affectiva and iMotions acquisitions amounts to SEK 29.5 million.
- Earnings after tax per share are 3.88 (-3.78), and after full dilution 3.75 (-3.78). Earnings after tax is positive due to deferred tax posted in quarter (SEK 209.9 million), which refers to upcoming tax position.
- Cash and cash equivalents totaled SEK 79.7 million at the end of December. The cash ending balance including credit facilities amounts to 161.6 million.
- Strong order intake during the quarter included 77 design wins for DMS and our first Tier 1 contract. Early January 2024 additional 19 design wins were signed. The estimated revenue of the orders amounts to SEK 2,050 million based on estimated product life cycle projections.

January-December 2023

- Net sales amounted to SEK 302.2 (219.5) million, which corresponds to an increase of 38%.
 Organic growth amounted to 33% (adjusted for the new accounting principle implemented in iMotions 2022) and is driven by Automotive business. Behavioral Research also shows stable growth.
- Operating loss amounted to SEK -282.9 (-343.0) million. The improved operating loss is
 driven by higher sales and lower OPEX, excluding exchange rate impact, compared to last
 year. Depreciation of the surplus value created in conjunction with the Affectiva and
 iMotions acquisitions amounts to SEK 116.3 million. The period was burdened by one-time
 costs due to the funding process amounting to SEK 2.8 million.
- Profit/loss after financial items amounted to SEK -283.2 (-344.1) million.
- Earnings after tax per share is -2.15 (-12.98), and after full dilution -2.15 (-12.98). Earning after tax has improved due to deferred tax posted in the period.

^{*}The subscription price in the rights issue carried out in February 2023 was SEK 25.50 per share, corresponding to approximately 58% of the share's fair value on the last day before the separation of subscription rights. The comparison figures are recalculated, as a consequence of the rights issue, with the calculated bonus factor of 1.18.

Comments from the CEO

The fourth quarter is characterized by an increased growth rate compared to the previous quarter. The organic growth came in at 50% (32% in Q3 2023). Again, it's Automotive that leads the way thanks to the rollout of our production programs. We have costs under firm control and continue to execute our business plan. 2023 ends in a fantastic way, 2024 looks even better.

Automotive

In accordance with our plan, the automotive volumes continued to rise in the quarter. The increase in demand can be attributed to the European regulation going into effect this year, affecting the decisions of OEMs in Europe as well as in other markets. The design wins that we announced during 2019 and 2020 are the cars that now reach production readiness. That's why our automotive business area is growing with 121% (83% in Q3 2023) compared to the same quarter last year.

Korea is still the primary growth engine, being well on their way to implement DMS broadly. Volumes have yet to pick up in other markets, although they are growing from a low level. We expect other markets such as Japan, Europe and the US to mature in the quarters to come. Simultaneously there's a strong market pull for Interior Sensing in the automotive premium segment. We are very well positioned for upcoming business in this new and exciting area.

Our new development programs are progressing as planned, and we see growth in the AIS product. The requests are coming both from fleet customers as well as from commercial vehicle OEMs eager to fulfill the European regulations. We expect a steady ramp up of AIS during this year.

Behavioral Research

The Business Area has really picked up speed since last year, growing at a very good 29% (17% in Q3 2023). This means that we are increasing our market share, thanks to a broad offering of software, hardware and services. We are confident that the profitable growth will continue this year, one of the cornerstones in turning the whole company profitable. We are as always exploring new innovations, whether they manifest themselves in our core technologies or how we package them to the customers. The research market for human

insight technology is still in an early stage and continued growth is to be expected, far into the future.

Final Words

Behavioral Research is on a trajectory of profitable growth, which we project will continue for many years. Our automotive business is not yet profitable, but thanks to the inevitable inertia of the industry we see a very clear path towards profitability during this year, as a steady stream of new car models goes into production and starts ramping up. These two factors work together to secure profitability for the whole company later in 2024.

The large automotive OEMs have awarded a major portion of the early contracts for DMS. As programs are nominated it's becoming clear what the distribution of market share looks like. It's the background for the market consolidation that we have seen in the latest quarters. This development is expected to continue, the reason being the shift towards Interior Sensing which will require an increased investment in product roadmaps.

We believe the increased technology investment is beneficial for Smart Eye, since being market leader means significant economy of scale.

Martin Krantz CEO Smart Eye

Estimated value of obtained design wins

As of the report for the third quarter of 2018, the company provides information on the estimated market value of obtained design wins at the time of publication of the report. The figures in brackets show the levels at the time of the publication of the preceding report, which in this case was November 9th, 2023.

The total estimated value of the company's 315 (229) design wins announced to date amounts to SEK 6,915 (4,865) million over a product life cycle.

If the company's system had been used in all car models on existing platforms by the 21 (20) car manufacturers with whom design wins have been communicated, the estimated value would amount to at least SEK 9,715 (8,960) million over a product life cycle.

The calculations have been made by the company based on OEMs estimated production volumes of car models and may change due to changed conditions for life cycle estimates of the car platforms.

One of the main reasons for the large number of Driver Monitoring System (DMS) design wins that has been awarded during the last year is due to the legislation that is about to take effect in Europe. Advanced Driver Distraction Warning will be required for new type approvals starting July 2024 and as of July 2026 all new vehicle registrations will require the same technology. Given the length of an automotive development project most of the OEMs have been making their decisions during 2021 and 2022, to fulfill the legislation once it becomes effective.

Design Win Year / (MSEK)	2022	2023	2024
Estimated revenue over the product life cycle from current design wins	3 835	6 715	6 915
Estimated revenue over the product life cycle from possible additional design wins with existing car manufacturers on existing platforms	4 075	3 000	2 800
Estimated revenue over the product life cycle including current and possible additional design wins with existing car manufacturers on existing platforms	7 910	9 715	9 715

The Group

Revenue

Fourth quarter 2023

Net sales for the period October to December 2023 amounted to SEK 91,3 (55.3) million, which is an increase of 65%. The organic growth (adjusted for the new accounting principle implemented in iMotions 2022) sums up to 50% which is mainly driven by Automotive, 121%. The Behavioral Research's organic growth is strong as well and sums up to 29%.

Net sales for the **Automotive** business area (Automotive Solutions and Fleet & Aftermarket) during the fourth quarter was SEK 30.8 million, compared with SEK 14.0 million in the fourth quarter of the previous year. Revenue is driven by higher activity in development projects referring to our design wins, increased sales of our fleet aftermarket product and license fees related to ramp up of car volumes.

For the **Behavioral Research** business area (Research Instruments, Media Analytics and iMotions) net sales during the fourth quarter amounted to SEK 60.5 (41.3) million. Organic growth sums up to 29%. Research Instruments and iMotions shows a very strong growth in the quarter.

January - December 2023

Net sales amounted to SEK 302.2 (219.5) million, which is an increase of 38% and with an organic growth of 33%.

Net sales for **Automotive** (Automotive Solutions and Fleet & Aftermarket) was SEK 88.2 million, compared with SEK 49.9 million for the same period the previous year, corresponding to an increase of 77%. The increase in sales is mainly due to increased activity in development projects and the increased demand for our fleet aftermarket product.

Behavioral Research business area (Research Instruments, Media Analytics and

iMotions) net sales during the period amounted to SEK 214.1 (169.7) million, which is an increase of 26% compared to the corresponding period previous year. Organic growth (referring to iMotions) sums up to 21% and with all business units showing growth. Research Instruments and iMotions increase number of new customer deals as well as upsell on existing customers which improve profitability significantly during the year.

Results

Fourth quarter 2023

EBITDA amounted to SEK -27.1 (-60.6) million. The higher result is due to increased sales during the period and that costs are in line with the cost reduction program. One-time expenses impact the result negative with 4.8 million, mainly due to social security charges from share incentive programs which now are in the money.

EBITDA excluding one-time items (-22,3) was slightly lower than last quarter, which is mainly driven by higher sales in the quarter.

The operating result for the fourth quarter totaled SEK -67.1 (-100.1) million. Depreciation of the surplus value created in conjunction with the Affectiva and iMotions acquisitions amounts to SEK 29.5 million in the quarter.

January - December 2023

EBITDA amounted to SEK -127.7 (-193.8) million. The improved result is driven by higher sales from both Business Areas, with improved Gross Margin and increased Gross Profit.

Operating loss amounted to SEK -282.9 (-343.0) million. Depreciation of the surplus value created in conjunction with the Affectiva and iMotions acquisitions amounts to SEK 116.3 million. The period was burdened by one-time costs due to the

funding process amounting to SEK 2.8 million.

Financial position

In addition to cash and cash equivalents of 79.7 SEK million, the Group has two unutilized bank overdrafts facilities of SEK 20 million and DKK 8 million and a credit facility of SEK 50 million.

Important events during the period

During December Smart Eye was selected to deliver its world-leading Driver Monitoring System (DMS) software to 67 additional car models with three different car manufacturers. The estimated revenue of the orders is SEK 1,850 million based on estimated product life cycle projections.

For the first time, Smart Eye will deliver its technology as a software Tier 1 supplier directly to the car manufacturer, with the software stack running on an advanced AI processing platform.

Events after the end of the period

Early in the year Smar Eye was once again selected to deliver its world-leading Driver Monitoring System (DMS) software to 19 additional car models with one global car manufacturer. The estimated revenue of the orders is SEK 200 million based on estimated product life cycle projections.

Parent company

Revenue

Fourth quarter 2023

Net sales for the period October to December 2023 amounted to SEK 49.4 (26.9) million, which amounts to an increase of 84% compared with the same period last year.

January - December 2023

Net sales for the period January to December 2023 amounted to SEK 148.6 (96.6) million.

Results

Fourth quarter 2023

The operating result for the fourth quarter totaled SEK -44.4 (-70.2) million. Improved result is driven by higher sales for Automotive and Research Instrument. During the quarter the earn-out with iMotions was settled, affecting the result negatively with SEK 1.4 million.

January - December 2023

The operating result for the period totaled SEK -195.4 (-158.5) million. The main reason for the lower result, compared to the same period last year, is the addition of product development resources in the parent company.

Significant risks and uncertainties in summary

Operational risks

The business operations are subject to risk factors that could impact the company's commercial and financial position. The risks relate in part to development operations proceeding as planned and in part to the company's success in recruiting qualified personnel to the necessary extent.

Financial risks

The company is financed through share capital and finalized a Rights Issue late February 2023. The purpose of the Rights Issue was to strengthen the company's financial position and finance the remaining capital requirement until the company becomes cash flow positive, which is expected during the second half of 2024.

Should the company not generate revenue to the extent and over the time perspective assessed by the Board, this could result in additional capital requirements.

The most significant risks related to the revenue is the planned ramp up in license revenue, should the automotive industry face further component issues or additional delays in OEM projects.

Subsequently, should the inflationary situation in the global economy accelerate, there is a risk of continued upward pressure on the cost base of the company.

Longer term as the sales increase, the company will face an increased currency exposure since most of the company's sales will be denominated in a currency other than Swedish kronor.

Market risks

Eye tracking is an emerging technology, whereby the company's products are currently used in behavioral research and as integrated products in the automotive industry. Regarding the Automotive business segment, a delay or the nonmaterialization of a launch of eye tracking in the automotive industry could entail a risk of a lower-than-expected growth rate. The future growth rate is strongly connected to the introduction of legislation in the European Union and at the time of publishing this report, there are no indications of a delay of this legislation. In the Research business area, the biggest market risk is the availability of funding in the academic field. A general decline in funding could be partly offset by an increased penetration of the market as the presence of the group's technology is still emerging.

Otherwise, regarding risks and uncertainties, refer to the 2022 Annual Report, page 35-36.

Transactions with related parties

Except for shared based incentive programs and intercompany transactions there were no transactions with related parties during the period.

Share Information

The Company is listed on Nasdaq First North Growth Market. Certified Advisor is Carnegie Investment Bank AB (publ).

Number of shares

The number of shares as of December 31st totals 35,192,232.

Share-based incentive scheme

At the AGM 2nd May 2023 it was resolved on the adoption of a long-term incentive program in the form of performance-based share options directed at employees within the Smart Eye group. The maximum number of performance shares will amount to 580,000.

The company also has three current incentive programs adopted by the 14th April 2021, the EGM 8th October 2021 and the EGM 29th June 2022.

Dividend policy

The Company is in a development phase and any surpluses are scheduled for reinvestment in the Company's development. The Board is not intending to submit a dividend proposal.

Accounting policies

The interim report has been prepared in accordance with the Annual Accounts Act and the general advice and guidelines of the Swedish Accounting Standards Board, BFNAR 2012:1, Annual Reports and Consolidated Financial Statements (K3).

This interim report has not been reviewed by the company's auditor.

Signing of the report

The Board of Directors and the CEO assure that the interim report provides a fair overview of the Parent Company's and the Group's operations, position and results and describes the significant risks and uncertainties in the Parent Company and the companies included in the Group.

This information is information that Smart Eye AB (publ) is obliged to make public pursuant to the EU Market Abuse Regulation. The information was submitted for publication at 8:00 am CET on February 21st, 2024.

Smart Eye is the global leader in Human Insight AI, technology that understands, supports and predicts human behavior in complex environments. Bridging the gap between humans and machines for a safe and sustainable future.

Today, our technology is embedded in next- generation vehicles, leading the way towards human-centric mobility through Driver Monitoring Systems and Interior Sensing solutions. Our Research Instruments offer unparalleled insights into automotive, aviation, assistive technology, behavioral science and many more fields.

Our subsidiary Affectiva is humanizing technology by pioneering Emotion AI, helping companies gain a deeper understanding of how consumers engage with their content, products and services, in automotive, media & entertainment, market research and beyond.

Our subsidiary iMotions provides the world's leading biosensor software platform, that synchronizes data streams in real time from multiple sensors.

Smart Eye was founded in 1999 and is headquartered in Sweden with offices in the US, UK, Germany, Denmark, Egypt, Japan, Singapore and China. A publicly traded company since 2016, our customers include NASA, Nissan, Boeing, Honeywell, Volvo, GM, BMW, Geely, Harvard University, over 1,300 research organizations around the world, 70% of the world's largest advertisers and 28% of the
